- Religious Education
- English
- Mathematics
- Science
- Commerce
- History
- Geography
- Technology
- Personal Development, Health and Physical Education
- Music
- Visual Arts

Curriculum

High Schooling at OLSH International sees us prepare year 9 and 10 students for the Year 10 National Examinations and the rigours of Secondary School. Our blended curriculum, from NSW Australia and Papua New Guinea, not only gives students a unique opportunity to succeed in the PNG National Examinations, but also towards gaining a NSW Record of Achievement at the completion of grade 10.

Professional Staff

Specialised Subject Teachers

OLSH International has a mixture of National and Expatriate teachers who have a Bachelor of Education as a minimum requirement for teaching in the High School. OLSH has consistently topped New Ireland Province in year 10 for the last 5 years and has ranked in the top 10 schools of Papua New Guinea as a whole.

NSW Year 10 Certification

AS OLSH International School is registered with the NSW Board of Studies, on completion of year 10, students are issued with a NSW Record of School Achievement (ROSA). This international credential is a bonus for students studying High School at OLSH.

Year 10 Work Experience

At OLSH International School following the Year 10 National Examinations, all year 10 students are placed on a work experience placement in various business houses and organisations around the local District. This gives students a taste of what the workplace is like and helps them in selecting subjects for years 11 and 12

Religious Education

As a Catholic Agency school founded by the MSC Sisters; the religious education program is an integral part of school life. The religious education curriculum from the Archdiocese of Brisbane in Queensland Australia forms the basis of religious education lessons in the middle school.

This coupled with weekly worship, retreats, celebration of feast days and celebration of the sacraments makes up the religious life of the school.

A firm foundation for your child's future

Education tailored to your child's individual needs

School Internet

The school has VSat internet connection provided by Digicel PNG. This allows access to the World Wide Web for both students and staff in the library and administration block. Late in 2013, this access will be expanded to include the school's computer room and will also have some wireless internet hotspots located around the campus.

School Production and Cultural Day

The school holds a school production or cultural day on alternate years.

School production is usually the performance of a well-known stage play, which includes student participation in acting, singing, dancing and assisting behind the scenes. This is a highlight of the school year and is enjoyed greatly by all students who participate in it.

The school's cultural day showcases the vibrant cultures of Papua New Guinea and particularly New Ireland. Students have the chance to participate in traditional singing, dancing, dressing and costume preparation. Expatriate teachers also have the opportunity to teach students dances from their own countries, thus giving an international flavor to our cultural day.

Library

The school's library houses more than 5000 texts and other resources. Students are able to borrow from the extensive fiction collection. The library also houses the Jim Ridge's Collection; which is made up of a vast array of historical and cultural texts and photos relating to Papua New Guinea. This is recognised as one the best PNG collections in the country.

Computers

The school has a dedicated computer room with 20 laptop computers as well as 10 notebook computers in the library specifically dedicated for student use. Future plans include the purchase of tablet computers for student use and internet access.
